

Measuring today to
protect tomorrow

Agenda of the program

Events open for the public:

1. Workshop on the [Role of Geophysics in Nuclear-Test-Ban and Geoscience for Security](#)

- When: May 16, 2024
- Where: Bucharest (Hybrid)
- Note: Requires registration.

2. Workshop: [Hands-on infrasound data analysis](#)

- When: June 6, 2024
- Where: Bucharest (Onsite only)
- Note: Limited places available. Requires enrollment in Earth Sciences field of study.

3. Workshop: Building up experience on the verification regime to ensure no nuclear explosion can go undetected

- When: July 4, 2024
- Where: Bucharest (Onsite)
- Note: Limited places available. Requires registration.

4. Workshop: Building up experience in recognizing and detecting explosive remnants of war using UAVs and airborne geophysics

- When: September 16, 2024
- Where: Bucharest (Onsite only)
- Note: Limited places available. Requires registration

5. Field Campaign – combining UAVs and geophysical technology for UXO detection

- When: 17-20/21 September 2024
- Where: Câmpulung, Romania (Onsite only)
- Note: Limited places available / requires enrollment in Earth Sciences field of study

6. Closing Workshop (results presentation & panel discussion)

- When: 14 November 2024 (Hybrid)
- Where: Bucharest, Romania
- Note: Limited places available. Requires registration.
