

**The third International Conference on Medical, Agricultural and
Industrial Microbiology**

Bacteria, Fungi and Viruses – Friends or Foes?

Date: 22-25 June 2026

MAIN TOPICS

The ICMAIM 2026 will provide a platform to discuss the following themes in the form of keynote lectures, invited and oral talks including poster presentations. The important themes which will cover during the conference are-

- Aquatic Microbiology,
- Basic Science to Applied Science,
- Biological Control,
- Conservation of Microbes,
- Cultural Heritage and Microbes,
- Dairy Microbiology.
- Environmental Microbiology,
- Fermentation Microbiology,
- Food Microbiology,
- Industrial Microbiology,
- Medical Microbiology,
- Microbes and Ecosystems,
- Microbes in Disease Management,
- Microbes in Health, Agriculture and Industry,
- Microbial Diversity and Conservation,
- Microbial Interactions with Plants and Humans,
- Microbial Secondary Metabolites,
- Microbial Toxins,
- Microbiology of Extreme Habitats,

- Microbiology of Wastewater.
- Petroleum Microbiology,
- Pharmaceutical Microbiology,
- Role of Microbes in Disease Management,
- Role of Microbes in Health, Agriculture and Industry
- Soil Microbiology,
- Symbiosis,
- Systematics, Phylogeny & Evolution,
- Veterinary Microbiology,
- Xenobiotic Microbiology.
